Jessica: please see the below link regarding additional suppliers for inerts. At this time please don't send me any updated CSFs. I'll let you know when to do so.

Thanks,
Heather

Thanks Jessica. I'm checking on the CSF issue and will get back to you. Thanks for the quick turn around on the other documents.

Subject: RE: [I] chlormequat chloride

Hello Heather,

I have attached the chlormequat chloride tolerance petition and the 8570-34 for the MUP. We wrote the 8570-1 application document to cover both the MUP and the end use product, since the petition was submitted for both products under PRIA R150. Do I need to create a separate 8570-1 for our end use product?

Regarding the CSF for Adjust SL, the formulations of the basic and alternate 1 are the same except for the supplier of the **Ex. 4 CBI**. There are two different suppliers for this inert ingredient. I was once told I could not have multiple suppliers of inert ingredients listed on the basic CSF. Rather, additional suppliers should be listed on an alternate formulation. Is this still the case?

Thanks,
Jessica

Jessica: sorry for all the emails. It would also be helpful if you could email me the full petition (98 pages) today. So just that and the two other forms that I mentioned earlier today. Thank you.

Jessica: don't worry about the alternate CSF right now. I'm making a list of things we'll need addressed so I'll send everything to you at once.

Jessica: I also noticed that you submitted a basic and alternate CSF for the end use product. However, the formulations are the same which is throwing me off. Did you mean to submit something different?

Can you email me the form 8570-34 for the MUP product and the form 8570-1 for the Adjust SL product?

Yes, I apologize. I attached it twice.

Are there any other documents you need me to send electronically for either the MUP or the End Use Product?

Thanks,
Jessica

Jessica: is the MUP private data matrix a duplicate? Five attachments were sent. Thanks.

Hello Heather,

I have attached the electronic versions of the data matrix for the technical and the end use product. I bolded the new MIRD numbers on the technical data matrix.

Thanks,
Jessica

Hello Heather,

I have updated the transmittal document with the MIRD numbers and the guideline numbers. Did you also say you needed me to add these MIRD numbers to our data matrix? If so, just let me know and I will send you both the updated public and private versions of this document.

Thanks,
Jessica

Jessica: sorry for the duplicate email. Can you also please email me a transmittal document that lists out the corresponding guideline numbers for each of the new studies that you submitted? Do you have a copy of the MRIDs you received? I may just give you a call.

Thanks Jessica. I do want to alert you to the fact while we will try to make the PRIA date on this action it may need to be delayed. But we can discuss that further down the line once we see where we are. This action was submitted in hard copy form in December and was in the queue to be completely scanned to make it electronic. However, that did not happen due to the shutdown. So we are a little behind. In the future is there any way that Eastman Chemical Company would be willing to use the on line portal for submissions?

Also when you have a moment can you also email me the two labels in PDF format? We do all of our reviews electronically now.

Thanks!

Heather

Hello Heather,

I have attached the two documents you requested. I look forward to working with you on this action. Please let me know if need anything from me.

Regards,
Jessica

Hi Jessica: thanks for the discussion this morning. I'll wait to hear from you regarding the respect to citation of data form and the waiver rationale.

Thanks!
Heather
